RadioWave Airplay Monitor Published Internet Radio Charts. Do not copy without written permission.

About The RadioWave Charts

The RadioWave Radio Monitor tracks the most popular titles on Internet and Satellite radio, as determined by **airplay** and **stream** detections from all of the monitored broadcasts on our panel. Rankings are determined based on **spin** detections, then **streams**. Titles are sent to **Recurrent** status if they are more than 30 weeks old and have dropped below the Top 30 on the national charts. Bullet assignments are not made at Radio Monitor level. Stream statistic is a sampling only.

Detections may not include all available radio servers and connections.

** This report includes **Daypart** breakdowns. Click TITLE for Daypart **stream** and **spin** information.
